Tactical Combat Casualty Care (TCCC) for All Combatants

COURSE DESCRIPTION:

TCCC guidelines were originally constructed to be implemented by US Special Operations Medics. Over the last 20 years, a constant flow of TCCC knowledge, techniques, equipment and procedures have been embraced by almost all levels of the military. NAR Training's instructor cadre has been a trusted provider in combat medical training since 1998 and is proud to offer a high-quality

Tactical Combat Casualty Care (TCCC) certification course built specifically for non-medical military personnel who are deploying to combat zones. This offering is unique due to the varied training facilities, use of reality-based training events, vast amounts of high-quality training equipment, advanced medical skill stations, and uniquely qualified instructor staff

LEFT: Intense Firefight on the 'X' During a Care Under Fire Scenario
